

Thermo-Calc Software

Job Advertisement

We are reinforcing our Research & Development

Thermo-Calc Software is expanding and we are looking for reinforcement to our software development group. The successful candidate for this position will work in a team consisting of 7 software developers. The main areas of responsibility will be related to implementation of new functionality but also maintenance of our software products. For this position several years of experience from development of commercial calculation software in C and FORTRAN is required. Also an academic degree at the level of Master of Science or PhD together with knowledge in Materials Science is desirable. Fluently spoken and written English is a requirement.

Send your application including an application letter and a CV to job@thermocalc.se or to Thermo-Calc Software AB,

We need your application before August 17.
